

AgilityAI

Full Lifecycle Enterprise AI Transformation Suite

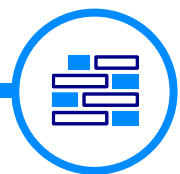

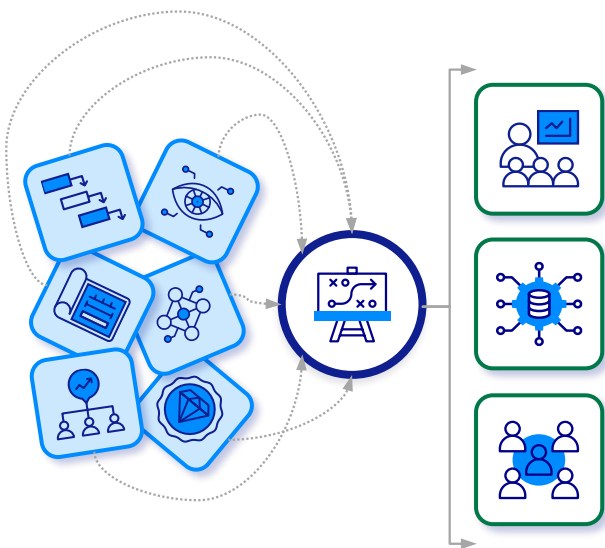

The ABCs of AgilityAI

Two decades of enterprise data expertise, now powering the next generation of AI transformation.

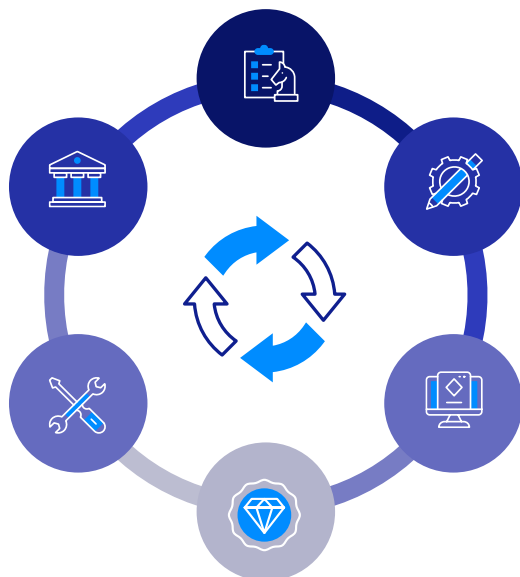

Align

Before committing valuable time and resources, we align leadership, data, and teams so that they're pointed in the same direction.

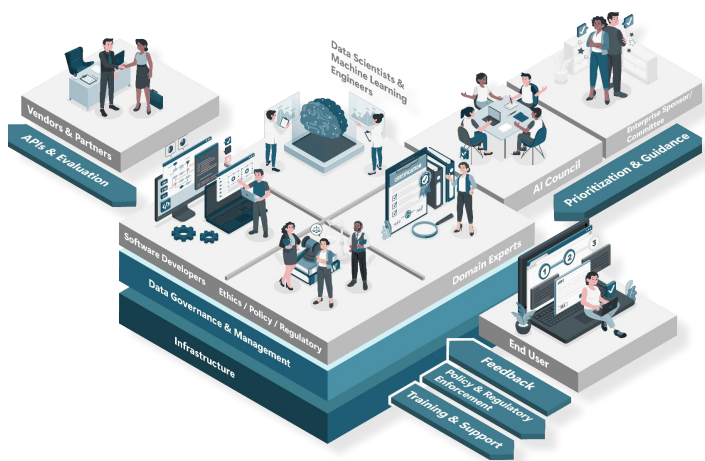

Build

We build with a disciplined AI engineering lifecycle, powered by proven accelerators from our AI Labs, to compress the path from concept to execution.

Control

We protect your investments with governance that creates trust, manages risk, and creates a value cycle that compounds over time.

The ABCs of AgilityAI

Two decades of enterprise data expertise, now powering the next generation of AI transformation.

Align

Before committing valuable time and resources, we align leadership, data, and teams so that they're pointed in the same direction.

Strategy & Use Cases:

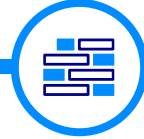

- Vision casting
- Use case fit & prioritization
- Strategic roadmap creation
- ROI assessment

Process & Data Readiness:

- Process transformation
- Data cleansing
- Target-state architecture design

AI Governance & Enablement:

- AI policy & risk frameworks
- Change management, talent strategy, & training/upskilling

Build

We build with a disciplined AI engineering lifecycle, powered by proven accelerators from our AI Labs, to compress the path from concept to execution.

Proof of Concept and Value:

- Manual experiments with tools
- AI-assisted engineering

AI Software Development Lifecycle:

- Build-code orchestration
- Model evaluation
- MLOps/LLMOps pipeline setup

Scalable Forward Deployments:

- Embedded engineers (FDEs)
- Reusable frameworks
- Agentic AI accelerators

Control

We protect your investments with governance that creates trust, manages risk, and creates a value cycle that compounds over time.

AI Governance:

- Policy & regulatory compliance
- AI Centers of Excellence
- Human-in-the-loop design

AI Operations (run & maintain):

- Model monitoring & AI FinOps
- Retraining pipelines & prompt management

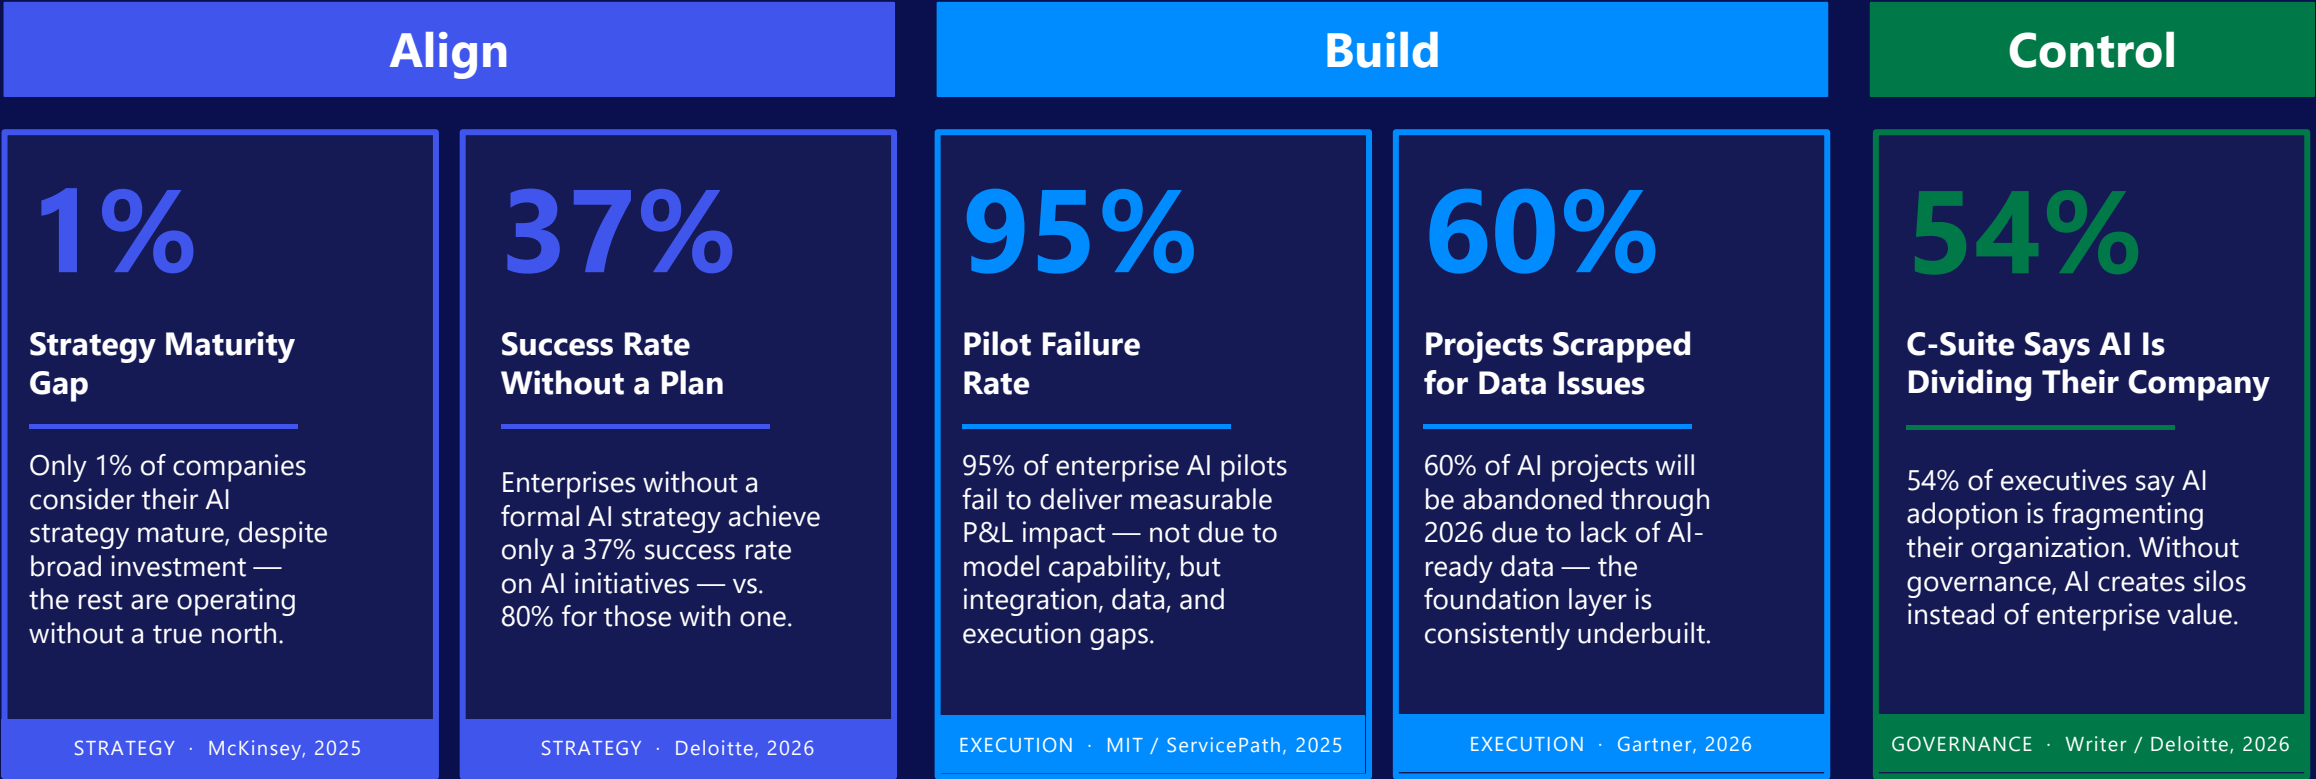

- Incident response & rollback

AI Assurance:

- Ongoing evaluation, confidence scoring, & benchmarking
- Bias and fairness audits
- Observability & explainability

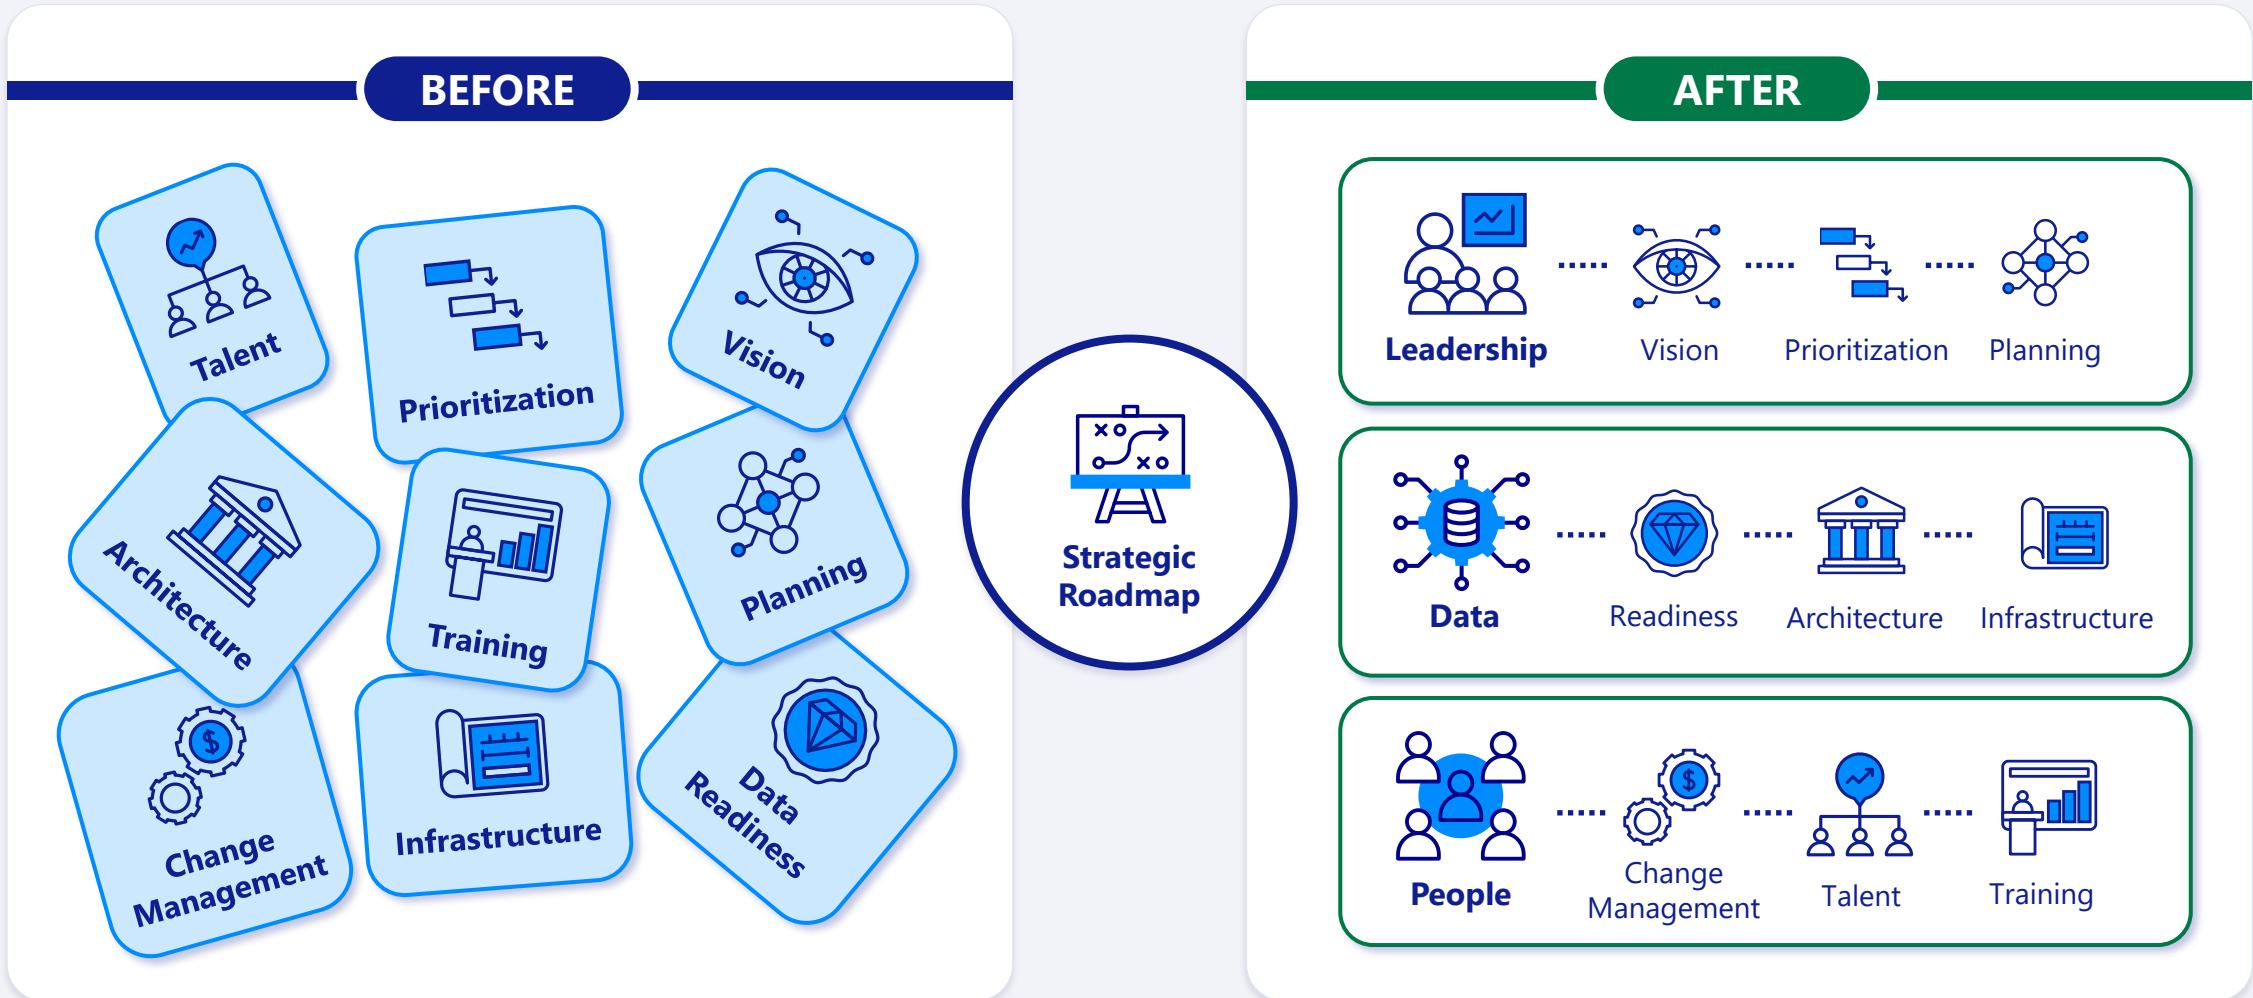

Why We Created AgilityAI

The AI Opportunity Exists – The Strategy, Execution, and Governance Make It Reality

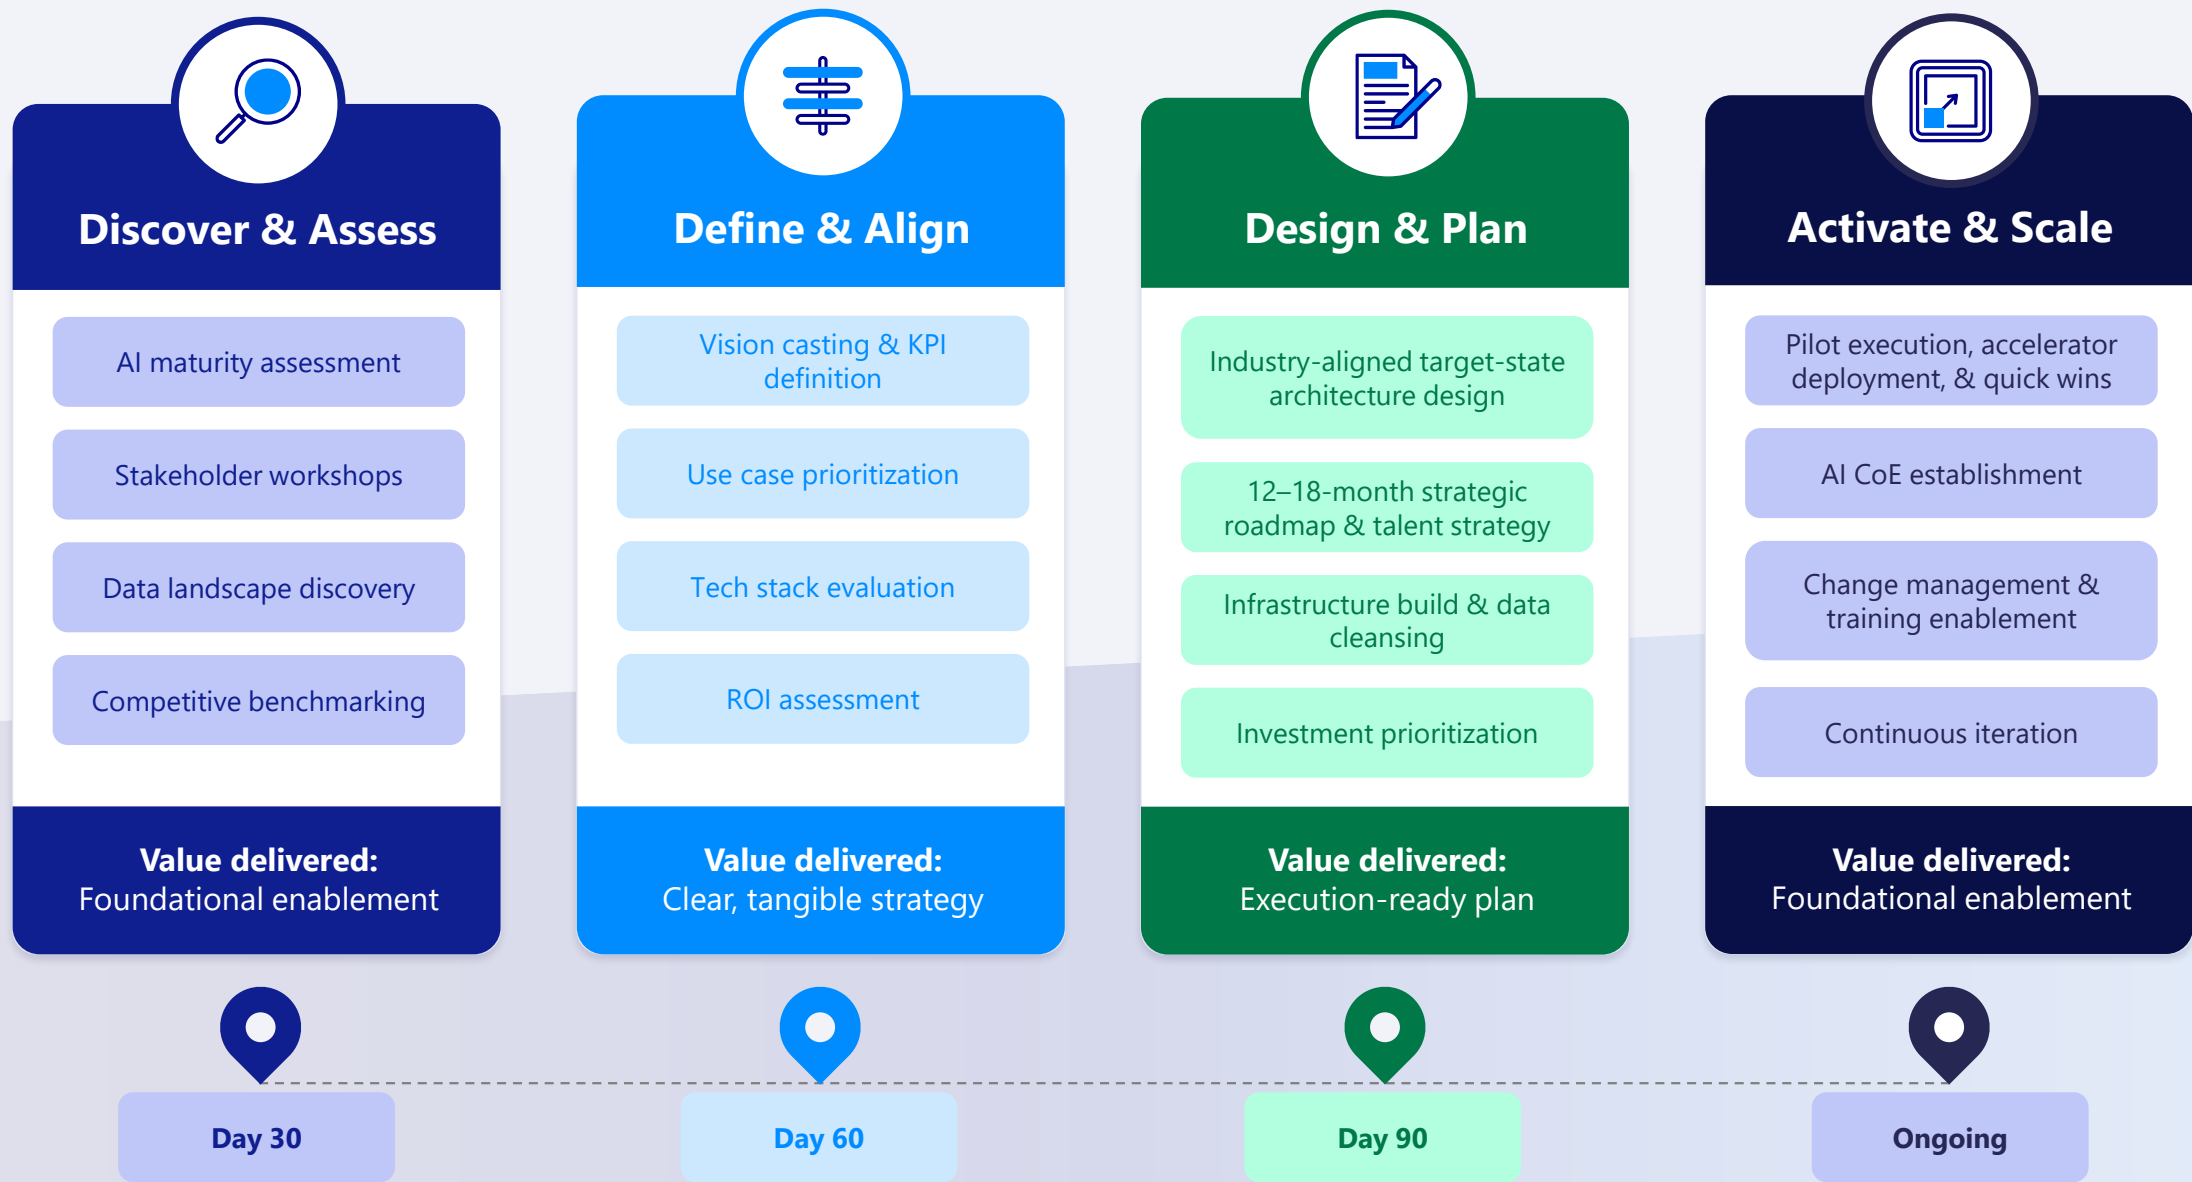

Align: Bring Together People, Strategy, and Data

Before committing valuable time and resources, we align leadership, data, and teams to a shared strategic roadmap so that they're pointed in the same direction.

Align: The Strategic Roadmap

Align: The Evolutionary Staircase (The Progression Map)

Most organizations are stuck at stage 1. Leaders reaching stage 3+ see 3x the ROI.

Stage 1: Explore

Value unlocked: 10-20% productivity lift

- **Mode:** Chat & copilots
- **Scope:** Individual
- **Autonomy:** Human does work, AI assists
- **Integration:** Standalone tools
- **Typical Use Cases:** Content drafting, Q&A, code assist
- **Timeline:** Weeks

Stage 2: Enable

Value unlocked: 30-40% task automation

- **Mode:** Task agents
- **Scope:** Team/function
- **Autonomy:** Human approves, AI executes
- **Integration:** Single system (e.g., HRIS, CRM)
- **Governance:** Departmental guardrails
- **Typical Use Cases:** HR FAQ bot, ticket, doc processing
- **Timeline:** 2-3 months

Stage 3: Scale

Value unlocked: 50% process efficiency

- **Mode:** Workflow agents
- **Scope:** Cross-functional
- **Autonomy:** Human monitors, AI orchestrates
- **Integration:** Multi-system orchestration
- **Governance:** Centralized AI CoE
- **Typical Use Cases:** Multi-workflows, cross-system automation
- **Timeline:** 6-9 months

Stage 4: Transform

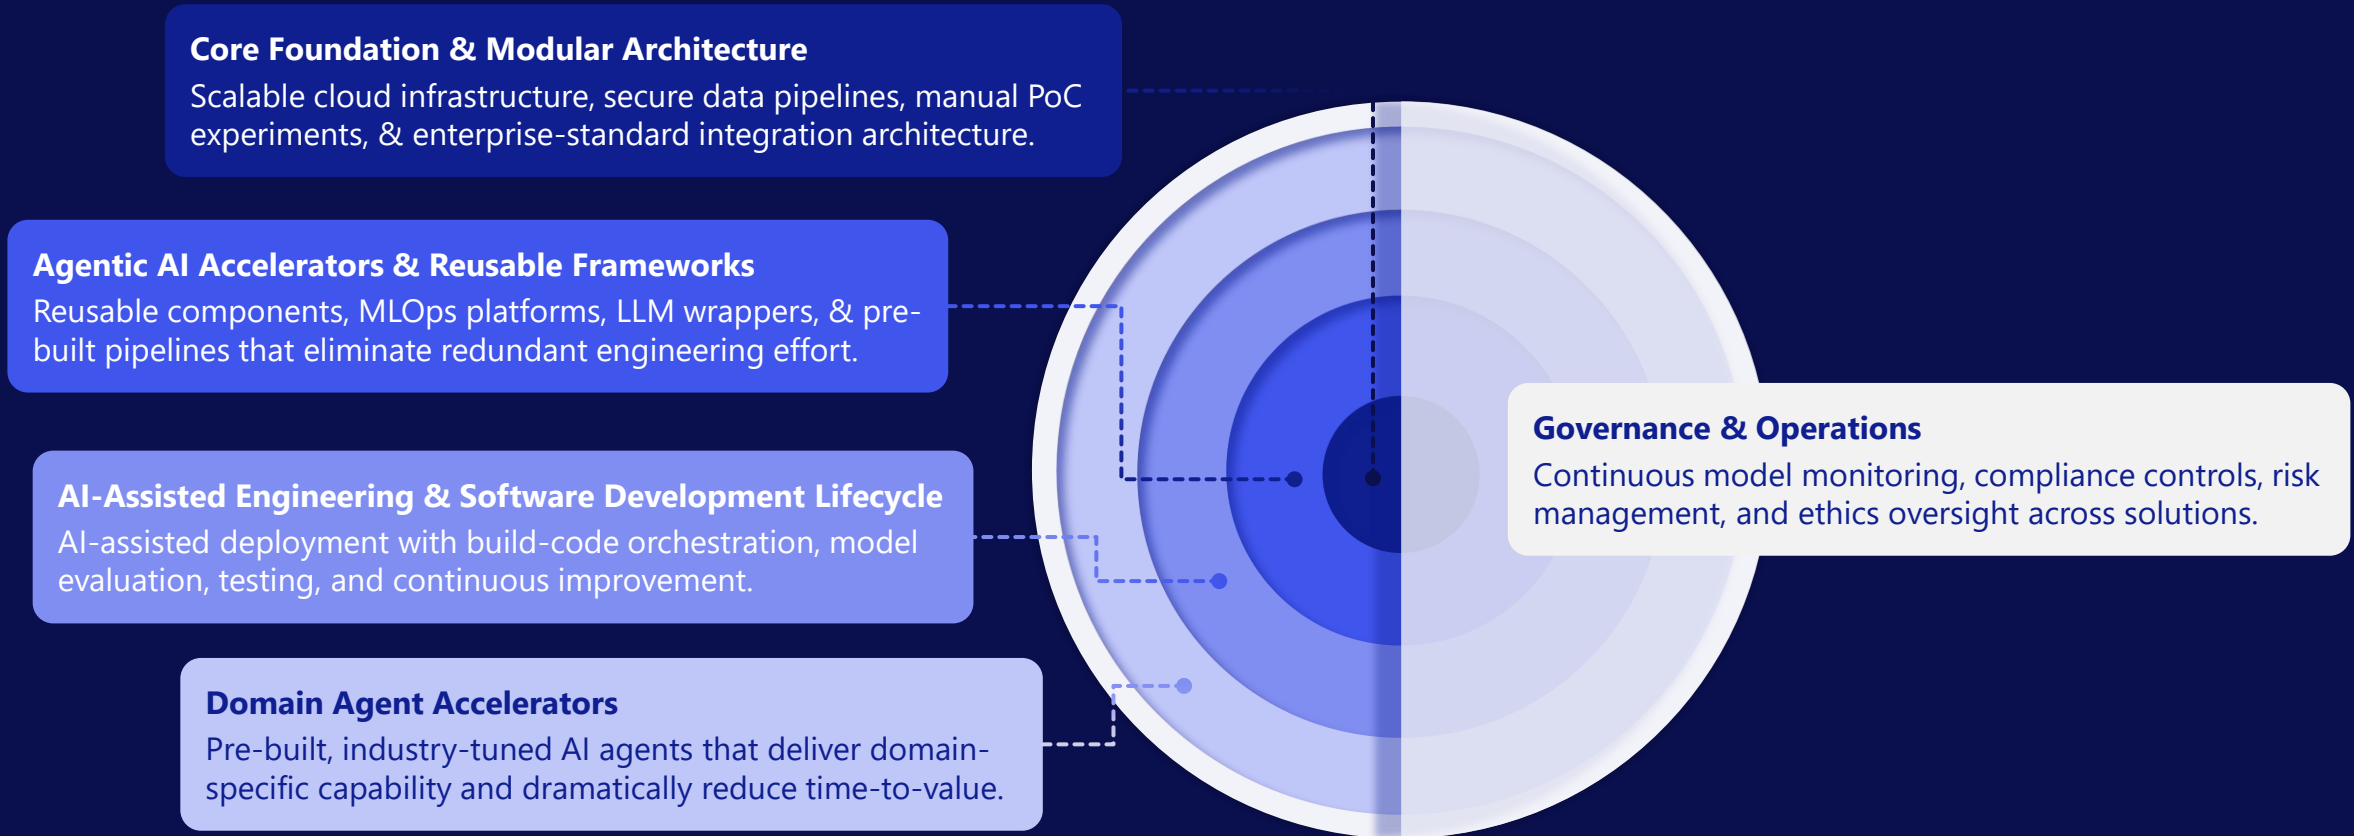

Value unlocked: New operating model, workforce redesign

- **Mode:** Enterprise digital workforce
- **Scope:** Enterprise-wide
- **Autonomy:** Human governs, AI operates
- **Integration:** Enterprise backbone (ERP, data fabric)
- **Governance:** Embedded AI governance
- **Typical Use Cases:** Centralized AI, autonomous operations, self-healing processes
- **Timeline:** 12-18 months

Organizations that skip directly to stage 3 without stage 2 foundations see 70% pilot failure rates. The path matters.

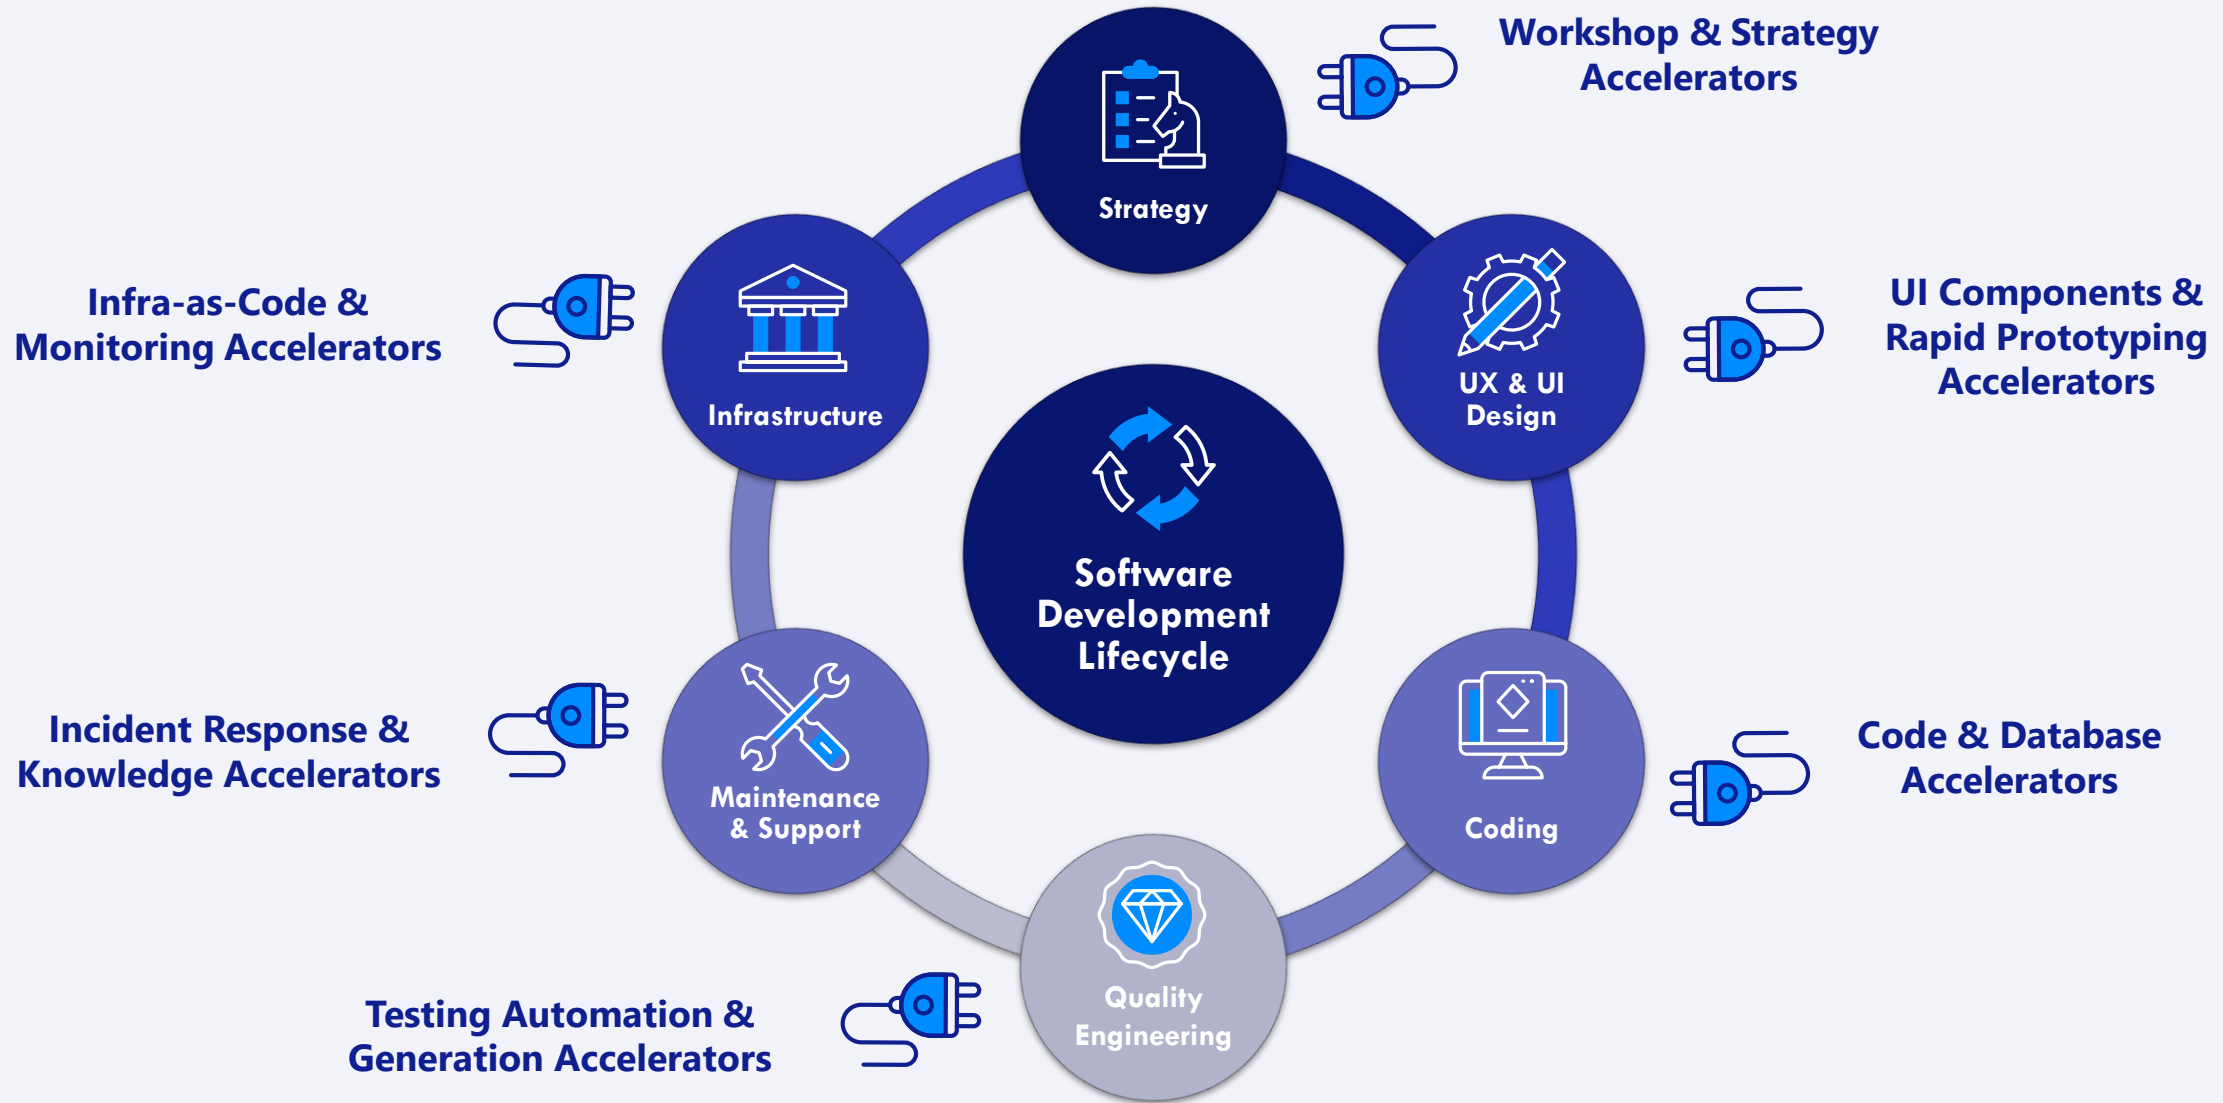

Build: AgilityAI Execution Model

Powered by an enterprise-ready core, surrounded by enterprise-wide governance

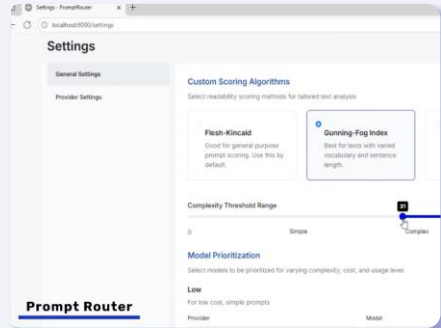

Build: Deliver AI at Speed and Scale

We build with a disciplined AI engineering lifecycle, powered by proven accelerators from our AI Labs, to compress the path from concept to execution.

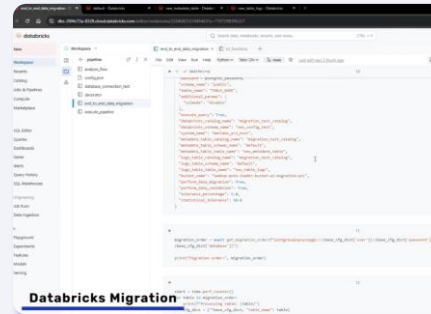

Build: AI Labs - Proven Accelerators

Our AI Labs continuously develop, test, and validate agentic AI capabilities with industry-specific tuning so that your project doesn't have to start from scratch.

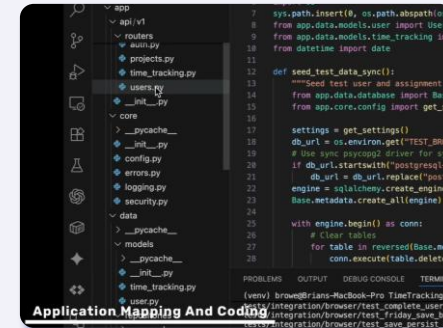

PromptRouter®:

Flexible LLM orchestration without vendor lock-in

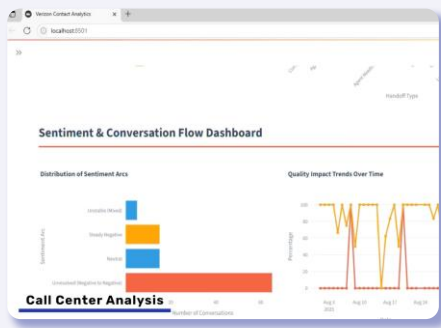

Data Migration:

AI-assisted migration to Databricks

App Mapping & Development:

Accelerated design, coding, & documentation

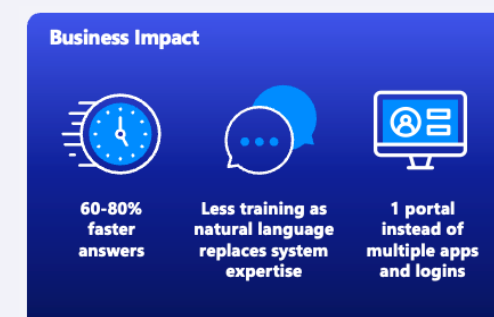

Call Center Analysis:

AI-driven insights for call center performance

HR Support Virtual Agent:

Conversational AI for modern HR support

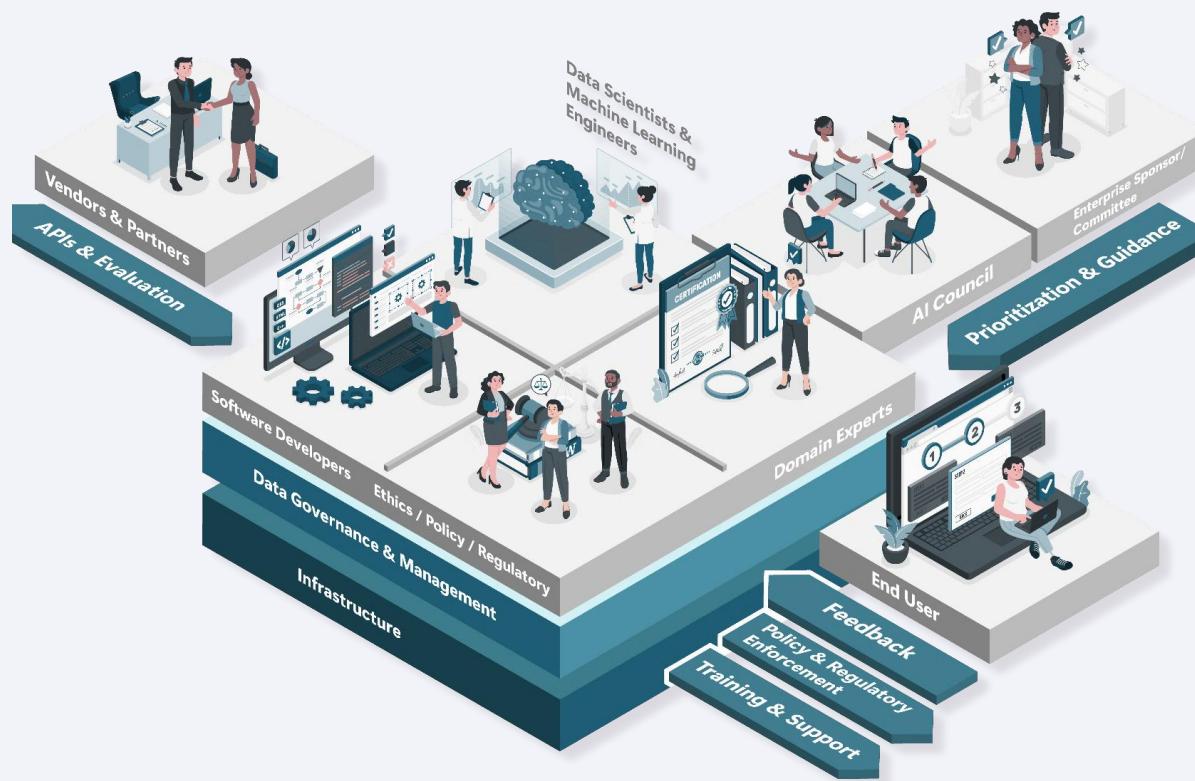

Chat to Enterprise:

Unified conversational interface to your systems

Control: Ensure Trust at Every Stage

We protect your investments with governance that creates trust, manages risk, and creates a value cycle that compounds over time.

AI Center of Excellence

Centralized governance artifacts for risk management and compliance

Data quality, integrity, and availability

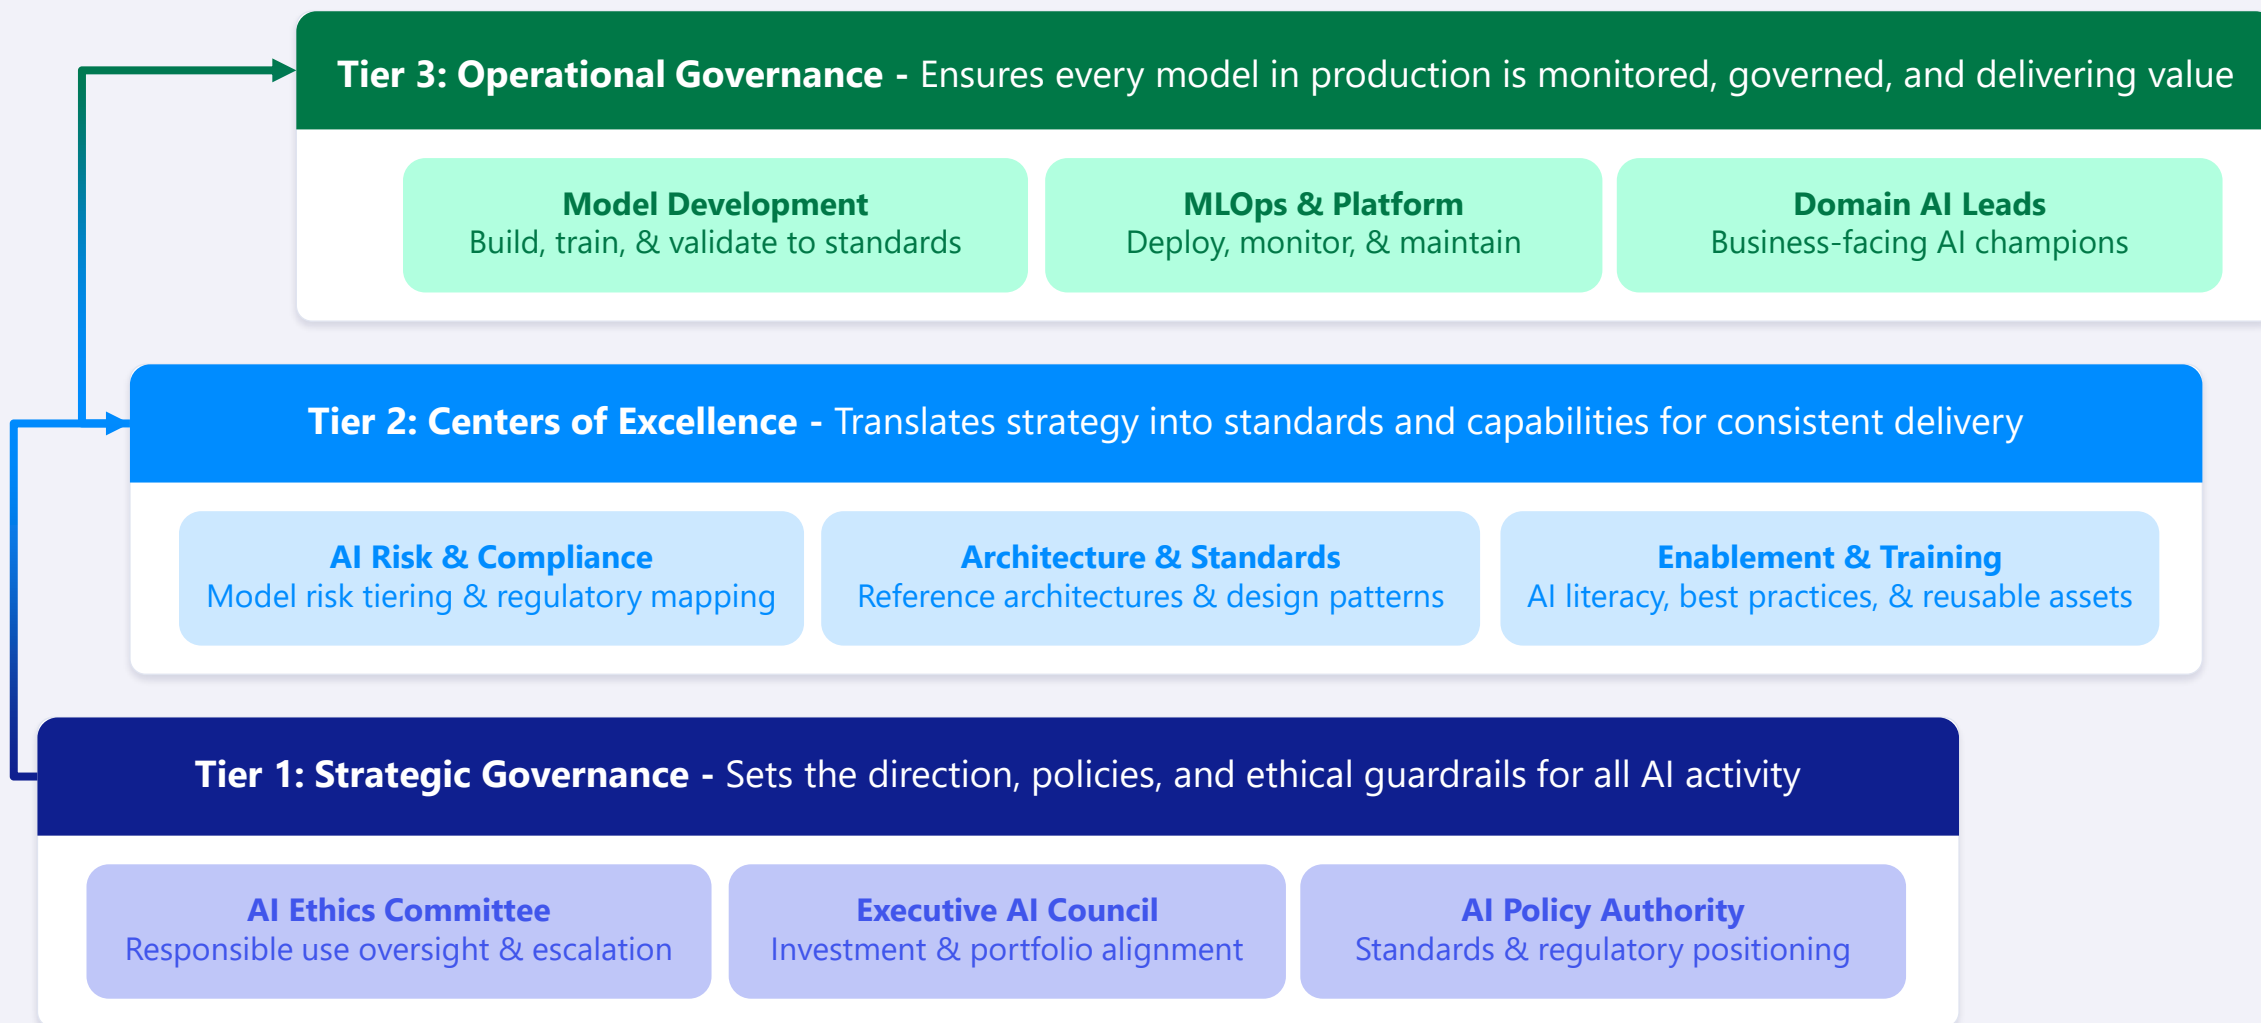

Monitoring and incident response

Oversight, access, and training

Cross-functional coordination and alignment

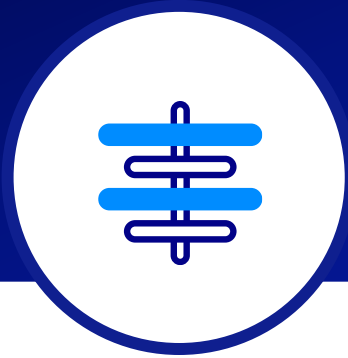

Feedback loops for strategy and AI refinement

Control: The Governance Operating Model

Why It Matters

The most common AI challenges map directly to the AgilityAI framework.

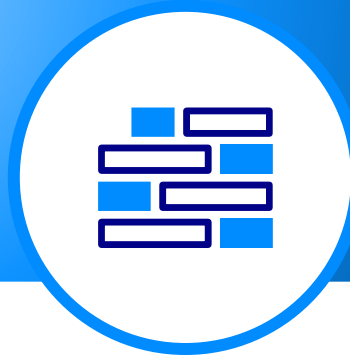

ALIGN

Data quality & availability

Align assesses data readiness and builds the data foundation before AI begins

User adoption & org change

Align addresses change management, talent strategy, and cultural readiness upfront

BUILD

Cost, speed, & resources

Build deploys proven accelerators and a structured SDLC to compress timelines

System & workflow integration

Build accelerates modular, production-grade solutions designed for enterprise integration

CONTROL

Trust, compliance, & risk

Control embeds governance, monitoring, and industry-specific regulatory controls from the start

Continuous improvement & feedback

Control keeps humans in the loop where it matters and helps AI learn as it grows.

The AgilityAI Advantage

Faster to value. Built to scale. Governed from day one.

Why Choose Marlabs

What our clients say sets us apart

Where We've Been

Our Advanced Data and Analytics Heritage

We have two decades of experience in enterprise data migration, governance, management, and advanced analytics: the work that successful AI initiatives and intelligent enterprises are built on.

We didn't come to data through AI; we came to AI through data.

Where We Are

Organization-First Business Transformations

Our clients choose us because we approach transformations with change management, talent strategy, and cultural readiness that makes adoption stick and keeps people from abandoning initiatives.

We make AI work at the people level, not just the tech level.

Where We're Headed

Continuously Expanding Accelerators Lab

Marlabs AI Labs continuously builds and validates agentic AI capabilities with industry-targeted specifications. That R&D translates into proven solutions that accelerate every engagement.

Every implementation makes the next one better.

Why Choose Marlabs: Proven Results

AI Case Study Highlights

FINANCIAL SERVICES

Our agentic AI platform creates enterprise-wide intelligence with powerful, integrated, and immediate insights.

HOSPITALITY

Our AI-driven digital transformations reduce global food waste, driving \$47M in annual cost savings.

LIFE SCIENCES

Our predictive AI analytics bring life-saving drugs to market faster by accelerating clinical trials.

- Intelligent Automation Services (2024)

NEXT STEPS

Step 1: Discovery Workshop

Align on AI maturity and priorities.

Step 2: Use Case Sprint

Identify and score top AI opportunities.

Step 3: Strategic Roadmap Development

Build a 12–18-month strategic AI roadmap.

Step 4: Pilot Execution

Deliver a high-value proof of concept.
